

## Labeling an OIL SAFE® Container

### PROBLEM:

The increased focus on reliability, combined with safety and environmental compliance pressures requires workplace containers to be clearly labeled.

- OSHA “Right to Know” laws require containers to be labeled such that employees can clearly identify the contents.
- Cross contamination of lubricants can lead to equipment failure.
- Dispensing the wrong fluid into equipment can cause catastrophic equipment failure.

### SOLUTION:

The LABEL SAFE range of identification products have been invented by the same people who invented OIL SAFE containers, bringing equivalent innovation and quality. The LABEL SAFE range addresses the identification problem with a broad choice of industrial grade color-coded labels and label holding devices to suit a variety of budgets and operating environments.

#### LABEL SAFE products are:

- **Color-coded** – available in a choice of 10 colors.
- **Industrial strength** – durable materials with anti static additives and UV inhibitors. Resistant to water, oil and non solvents.
- **Configurable** – choose from various components and combinations to maximize visibility or meet environmental requirements.
- **Customizable** – holds various labels.
- **Consistent** – solutions that enable accurate and standardized matching of containers to bulk storage and fill points.
- **Simple** – easy to install, identify and maintain.

Two popular solutions and related items overleaf.

### HELP:

There are numerous other LABEL SAFE identification products available for this and other applications. Please contact your authorized supplier for more information or assistance with your labeling needs.

# POPULAR LABELING OPTIONS

## COLOR-CODED DRUM RING AND ADHESIVE LABEL

Our most popular option, this solution provides an economical and durable color-coded solution that ensures the container is easily identified when the lid is removed, and is removable for cleaning.

### Advantages

- Fits securely around the neck of any OIL SAFE drum.
- Presents highly visible key information and available in all 10 OIL SAFE colors.
- Clearly identifies drum when OIL SAFE lid is removed ensuring the correct lid is returned to the correct drum.
- Enables Color-Coded Drum Ring and label assembly to be quickly and easily removed and replaced when drums need to be cleaned thereby preserving the labels and increasing cycle life.
- Highly durable labeling solution for all operating environments.

## LOCKABLE DRUM RING, LABEL POCKET, PAPER ID LABEL AND LABEL FRAME

This solution allows for larger and more detailed labels.

### Advantages

- Label assembly fixes securely into position around neck of OIL SAFE container.
- Color-coded Label Pocket Frame provides for high level color based visual recognition and protection of identification labels in demanding environments.
- Enables Lockable Drum Ring and Label assembly to be quickly and easily removed and replaced when Drums need to be cleaned thereby preserving the labels and increasing cycle life.
- Pocket, Frame and Lockable Drum Ring provide for multiple labels to be affixed to OIL SAFE containers including MSDS sheets.

## RELATED ITEMS

Providing better protection of your lubricants throughout its chain of custody will result in improved equipment uptime, reduced maintenance costs and assist with workplace organization.

These Related Items will ensure operators apply the correct oil into OIL SAFE containers and into the matching color-coded fill point on equipment

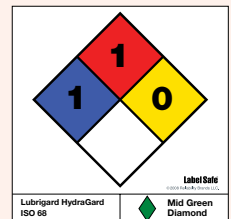

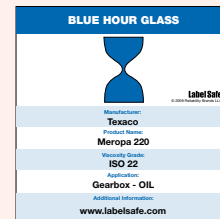

### LABEL SAFE ID Tab and Washer

### Benefits

- **Durable** fill point labeling solution
- Available in **10 colors** and washers in **6 sizes**
- Label recess for **accurate** lubricant identification

### Labels for Bulk Systems (ID & NFPA)

### Benefits

- **Large** 3.25" x 3.25" adhesive vinyl labels
- Oil and water **resistant** vinyl labels
- **Unique** identifiers for each lubricant

### LABEL SAFE Evaluation Kit

### Benefits

- Contains a **selection** of LABEL SAFE labeling components
- **Try** the products on your site
- **Design** a solution to suit your budget and operating environment
